Location : Eluru, Andhra Pradesh

PROFESSIONAL SUMMARY

MCA graduate with hands-on experience in Angular, TypeScript, Firebase, and frontend application development, skilled in building responsive and user-friendly web applications. Strong understanding of UI/UX principles, authentication, state management, and modern frontend architectures. Passionate about creating scalable digital experiences and eager to contribute as a **UI/UX Developer or Frontend Developer**.

TECHNICAL SKILLS

- **Frontend** : Angular , TypeScript , HTML5 , CSS3 , Responsive Design
- **Backend** : Node.js
- **Database & Cloud** : Firebase (Firestore, Auth, Hosting, Realtime Database) , SQL , MongoDB
- **Programming** : Python (Basics) , JavaScript
- **Tools** : Git , GitHub , VS Code , NPM , MS Office

PROJECTS

Beauty Parlour Application

Tech Stack : Angular , Tailwind CSS , Angular Material , TypeScript , RxJS , Reactive Forms , JWT Token , Chart.js , Firebase

- Designed and built 11 production-ready Angular pages with complete user flows from authentication to checkout.
- Created responsive, accessible UI using Angular Material and Tailwind CSS across all devices.
- Implemented comprehensive form validation with Reactive Forms and custom validators for seamless user experience.
- Managed application state with RxJS and implemented route guards for role-based access control.

Github : <https://github.com/rajeev0124/Beauty-parlour-application>

Milk Management System

Tech Stack : Angular , Tailwind CSS , Font Awesome , Firebase , Chart.js , jsPDF

- Designed 15+ reusable UI components (tables, modals, spinners, forms) with consistent branding using Tailwind CSS across 8 feature modules and multiple user roles.

- ❑ Built adaptive interfaces for 5 user roles with role-based permission controls, responsive mobile-to-desktop layouts, and intuitive navigation patterns.
- ❑ Implemented user feedback systems with notifications, confirmations, loading states, error handling, and accessibility standards for better user experience.
- ❑ Created data visualizations with interactive charts, sortable tables, multi-step forms, and PDF export features for managing business data across delivery, finance, and reports.

ACADEMIC PROJECTS

Autonomous Vehicle Navigation using Machine Learning

Tech Stack : Python , Flask , OpenCV , NumPy , Html , Css , Werkzeug

- ❑ Developed a computer vision-based system for autonomous vehicle navigation focusing on lane detection using Python and OpenCV
- ❑ Implemented an end-to-end pipeline including grayscale conversion, Gaussian blur, Canny edge detection, ROI masking, and Hough Line Transform.
- ❑ Built a Flask-powered web application for real-time lane detection outputs from driving videos.
- ❑ Enabled modular design for future integration of deep learning, LiDAR, radar, GPS, and vehicle control systems

EDUCATION

❑ Master of Computer Applications (MCA)

Andhra University College of Engineering | 2023 - 2025

CGPA: 8.19

❑ Bachelor of Science (Mathematics , Physics , Chemistry)

Andhra University | 2020 - 2023

CGPA: 8.63

CERTIFICATIONS

- Python Programming Training – Offline Certification
- Salesforce Administrator Virtual Internship – Salesforce

SOFT SKILLS

Problem-solving mindset

Communication and collaboration

Quick learner

Leadership and teamwork

Positive attitude
